Postdoctoral Associates

Nencki Institute of Experimental Biology, Polish Academy of Sciences, Warsaw, Poland

Applications are invited for ten Postdoctoral Research Associate posts at the Nencki Institute of Experimental Biology, Polish Academy of Sciences, Warsaw, Poland. The positions are funded by the EU FP7 Capacities programme. The Nencki Institute develops and applies a multi-level application of cutting edge biological imaging techniques for improving the understanding of animal and human biology from molecular and organelle levels through cell function to the whole organism. Over the recent years bio-imaging has become the primary investigation method at the Nencki Institute and represents one of its strategic development areas for the next decade. We are now looking for enthusiastic and talented researchers to undertake bio-imaging projects focused on molecular, cellular, organelle and organism levels.

Applicants should hold a PhD degree in the field of life sciences, have extensive experience in visualization of bio-processes and expertise in molecular biology, cell biology and/or biochemistry. An outstanding academic track record is essential and at least one first author publication in a prominent journal is expected.

The positions are available from June 1, 2011
Employment duration: up to 24 months
